Gomment. The volume of incoming and outgoing shipments of the Velten fuel depot slightly increased in April 1954. It amounted to 164 carloads of incoming shipments, and 320 carloads or 6,117 tons of outgoing shipments (Twenty-Fourth Air Army) and to 178 carloads of incoming shipments, and 179 carloads or 2,793 tons of outgoing shipments (GOFG). The increase in the volume of supply traffic resulted from intensified flying activity (including might flying) this time of the year and from increased deliveries to army units in the summer camps. The traffic relations are known.
